

POSITION: .Net Developer

Job Category: Technology

Employment Terms: Full-time

Location: Montréal Old-Port

Tungsten Revenue owns several healthcare supplement brands focused on delivering high quality goods and services to customers through direct response and an ever-growing online channel.

Our business is almost entirely credit card based and processing card-not-present transactions poses a range of problems. To scratch our own itch, we built FlexPay, an Enhanced Payment Gateway. It mitigates against these problems on a transaction-by-transaction basis with a proprietary, statistics-based decline salvage and risk balancing strategy. FlexPay has become a cornerstone of our business and will likely someday supplant our direct to consumer business.

Tungsten Revenue was named as one of **2017's Great Places to Work**. We are a dynamic and welcoming company that strives to hire the best and brightest people. We've been told that that we suffer from a "Never Good Enough" syndrome, and we proudly embrace it. We are looking for people who are never satisfied with themselves or their company, constantly pushing to improve both.

Once through our doors, you'll discover a dynamic and culture focused organization that offers an exceptional work environment. Efficiency is one of our core values and we endeavor to eliminate, automate, or outsource the mundane and repetitive both for ourselves and our partners. You are given the autonomy to have a substantial impact on the performance of the company and your work will be creative and challenging. **It will never be boring**. If you're the type of person that thrives in an environment of smart, driven, and competent colleagues, then you may have found your home.

Your contribution

We are looking for an experienced full stack .NET developer to add to our development team. We build and maintain a variety of web applications, integration services, a processing engine and data warehousing to support our billing platform. You will be responsible for architecture and implementation of new application features and integration services, as well as maintenance and bug fixes for existing software.

As a full-stack developer, you'll be working on both front-end and back-end code. You may not know all the technologies we use coming in the door. That's OK, as long as you like to learn fast and have a good mind for the core principles of software development, you'll fit right in.

Responsibilities

- Participate in all phases of development: analysis, conception, implementation, testing, documentation and deployment.
- Plan, develop, test and migrate solutions.
- Develop quality code while following best practices and conception models, as well as following standard IT procedures.
- Update and maintain current web applications and websites.
- Test and propose innovative technologies and solutions that can better support the business

Qualifications

- 2+ of web development experience building and running large scale, production web sites
- 1 year of experience with ASP.NET MVC, Web APIs, C#, and / or the .NET Framework
- Experience with Microsoft Azure or similar cloud services
- Self-motivated, requiring minimal supervision and the ability to stay focused even when the requirements are broad.
- Advanced SQL/database programming Microsoft SQL Server (T-SQL)
- Security best practices, OAuth 2.0 authentication, PCI
- Ability to communicate verbally and in written form in a clear concise manner along with a positive outlook.

Benefits

- New employee onboarding program
- Unlimited paid vacations
- Flexible hours
- Relaxed dress code
- Group RRSP program
- Weekly free lunches
- Fresh and healthy snacks
- Comprehensive group insurance package
- Company-sponsored public transport discounts
- Supports continuous learning and development
- In-office showers, kitchen, rec-room, bike parking
